

Customer Due Diligence – KYC Operating Procedure

Document Control

Document ID: COM-KYC-007 | Version: 4.1 | Owner: Compliance Operations | Classification: Internal

Objective

Defines controls used to verify customer identity and determine whether additional compliance review is required.

Mandatory Checks

Identity-document validation, customer-information consistency, address verification where required, sanctions screening, PEP screening and customer-risk classification.

Automated Verification

The onboarding platform performs document-field extraction, consistency checks and configured screening rules. Automated outcomes retain status and processing timestamps.

Manual Review Triggers

Potential sanctions matches, conflicting identity information, high-risk classifications, unresolved document discrepancies and policy exceptions require authorized compliance review.

Decision Outcomes

Verified, verification failed, additional information required, compliance review required or processing exception.

Audit

Case records retain verification status, decision reason, timestamp, source reference, applicable rules/model version and reviewer details where applicable.

Access

KYC information is accessible only to authorized users and services. Access events are logged according to information-governance requirements.
