

Retail Banking – Customer Service Knowledge Base

Document Control

Knowledge Base: CS-Retail-002 | Version: 3.7 | Owner: Customer Operations | Review: 30 September 2026

Password Reset

Complete the approved customer-authentication procedure before initiating a digital-banking password reset. Use approved communication channels for reset instructions.

Lost or Stolen Card

Block a reported lost or stolen card through the card-management workflow and confirm the resulting status.

Address Change

Process address changes only after prescribed identity and supporting-document verification. Failed validation enters the appropriate service queue.

Transaction Dispute

Capture transaction reference, date, amount, dispute category and customer statement, then route the case to dispute management.

Fraud Escalation

Suspected account takeover, unusual transaction patterns and repeated authentication failures must be escalated using the fraud-reporting workflow.

Knowledge Governance

Articles require an owner, version, effective date, review date and change history.
